

ALUMINIUM ROLLER SHUTTERS

FOR SPECIAL VEHICLES

SRS
ROLLER SHUTTERS

THE COMPANY

Serena Production is a **family-owned Italian company** based in **Montirone (Brescia)**, with over 50 years of experience in aluminium processing for special vehicles.

Founded in **1973** by **Luigi Serena**, the company began by providing cleaning and finishing services for aluminium profiles used in vehicle bodywork. Through close cooperation with leading Italian body builders, the company soon recognized the potential of an innovative solution: the aluminium roller shutter, designed as a **modern and efficient alternative** to traditional closing systems.

Over the years, Serena Production has specialized in the design and manufacturing of **aluminium roller shutters** specifically developed for special vehicles.

Today the company manages the **entire production process in-house**, from design and aluminium extrusion to the assembly of the profiles, ensuring high quality standards, reliability, and flexibility.

Serena Production roller shutters are marketed under the registered trademark **SRS Roller Shutters**, internationally recognized for their durability, functionality, and refined design.

Entirely manufactured in Italy, SRS products represent the **excellence of Made in Italy**, combining engineering expertise, technical reliability, and continuous innovation to meet the demands of the global special vehicle market.

1973

Foundation of
Pulimetal snc.

Start of the production of
aluminium roller shutters.

1976

1980

The production activity expands, doubling its operational space and taking the new company name **Serena Pulimetal snc**, based in **Flero** (Brescia).

With the entry of the second generation, **Stefano** and **Alessandro**, into the company management and in response to new business developments, the company transitions to an industrial structure and becomes **Serena Production srl**.

2004
